PERSONAL PROFILE

I am a front-end web developer looking forward to a successful career in software development. I currently use the React framework under JavaScript, and I hope to build cross-platform applications using React Native in future. From time to time, I constantly develop my professional skills, and I am open to work with an organization with opportunities for growth.

PROFESSIONAL SKILLS

Creative Design

I use professional graphic tools, including Adobe XD, Adobe Illustrator, Adobe Photoshop, and InDesign for the following:

- UX/UI design
- Web design, and prototyping.
- Create magazines, flyers, logos, and annual reports.

Web Development

With JavaScript, I can use both frontend and backend tools for the following:

Client-side

- Build fluid animations using CSS animations and transitions.
- Build smaller and less complex functions.
- Make HTTP requests to and from backend APIs.
- State management with React.

Server-side

- Build API endpoints using express JS.
- Build database models and schemas to make CRUD operations using Mongoose and MongoDB atlas.
- Make API calls from APIs using Axios.
- API testing with postman.
- Rendering backend data using EJS.
